

KICHAH FAVOUR MBANI

Frontend / Full-Stack Developer

674283837 / 671465314 | kichahfavour75@gmail.com | Bamenda, Cameroon

PROFILE

Self-directed frontend/full-stack developer based in Cameroon, building and shipping real-world web products end to end — from e-commerce platforms and business dashboards to PWAs and chat applications. Comfortable owning a project from architecture through deployment, working across React, Vite, Supabase, and vanilla JavaScript, with practical experience integrating mobile-money payment flows (MTN Mobile Money, Orange Money) for the Cameroonian market. Currently pursuing a Bachelor's degree in Computer Engineering while running a live electronics e-commerce business.

EXPERIENCE

Founder / Developer — TechZone

Ongoing

Live electronics e-commerce store (phones, laptops, audio equipment) — Cameroon

- Built and operate a live e-commerce store, including a full production version (React/Vite + Supabase, hosted on Vercel) and a complete ground-up redesign in plain HTML/CSS/JS.
- Implemented WhatsApp-based ordering, MTN Mobile Money / Orange Money / Cash-on-Delivery checkout, and a Chart.js-powered admin dashboard for product, order, and coupon management.
- Leading migration from a localStorage-based prototype to a Supabase-backed production database with proper schema and row-level security.

Frontend Development Contributor — Veridyl

- Contributed to frontend development work on team projects.
- Contributed to QA testing and research efforts supporting product development.

Web Development Intern — Effulgence Tech

- Gained hands-on introduction to professional web development practices and workflows as an early-career intern.

SELECTED PROJECTS

Shop Easy — E-commerce Marketplace Platform

- Full-scope production e-commerce marketplace built in phases with Next.js (App Router), Supabase, and Tailwind CSS — 120+ files delivered across 7 development phases.
- Includes manual MTN/Orange Money payment verification workflow, role-based admin (Super Admin/Staff), vendor/marketplace mode, category and CMS pages, support tickets, SEO, and personalization features.

Whisper — Chat Application

- Built a real-time chat application as a portfolio piece demonstrating messaging architecture and UI design.

Jotter — Digital Notepad PWA

- React + Vite Progressive Web App with rich text editing (Tiptap), Supabase-backed cross-device sync, and magic-link/email authentication.
- Packaged as a deployable, documented project ready for setup and deployment via Vercel CLI.

Fitness Tracking PWA

- Five-tab dashboard built with React + Vite, featuring Recharts data visualizations, localStorage persistence, custom navigation, full PWA support (manifest + service worker), and light/dark/system theming.

Verdant & Co. — Luxury Lifestyle E-commerce Store

- Built a complete e-commerce storefront from scratch using plain HTML, CSS, and JavaScript.

QuickFix & PackageLog & Taska

- Designed an on-demand services marketplace concept (QuickFix) connecting users with plumbers, electricians, and mechanics via admin-mediated contact and commission-based payments.
- Built a package delivery tracker (PackageLog) and a feature-rich to-do app (Taska) with subtasks, tags, priorities, and push notifications via Service Worker + Push API.

TECHNICAL SKILLS

Frontend	React, Vite, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, responsive design
Backend / Data	Supabase (auth, database, storage), REST APIs, relational database design, Row-Level Security
Tools & Deployment	Vercel CLI, VS Code, Live Server, Git-free deployment workflows
Payments	MTN Mobile Money & Orange Money integration, manual payment verification workflows
Other	Chart.js & Recharts data visualization, PWA development (manifest, service workers, push notifications), business/ERP software evaluation
